TYPES OF INCINERATORS

1. ROTARY KILN
2. FLUIDIZED BED
3. MOVING GRATE
- LIQUID INJECTION

THE NEWS

The Incineration is the process of burning the hazardous materials at temperatures high enough to destroy contaminants. Incineration is conducted in an "Incinerator" which type of furnace is designed for burning hazardous materials in a combustion chamber.

Incinerator container for burning refuse, or plant designed for large scale refuse combustion.

SPECIFICATIONS

1. The Incinerators can work using Natural Gas.
2. Incineration means reducing something into "Ashes"
3. It is used to destroy Household waste, Chemical waste and biological waste.
4. It is eco-friendly because the waste incineration contributes to air pollution.
